

Evangelos Emmanouil Papangelis

But you can call Me Vangelis

MEET ME

I am a "millennial" product enthusiast passionate about designing for the future of SaaS industry. Also involved in user impact solutions and investing through design in web3 and the problems it addresses.

I started out as an industrial design engineer before deciding to niche in Product Design.

I am based in **Athens**.

SKILLS

- User flows
- Task analysis
- Information architecture
- Wireframing
- Metrics evaluation
- Growth strategic thinking
- User interviews
- Competitors analysis
- A / B Testing tools
- Documentation
- Design System creation / maintenance
- UI/UX Design
- Prototyping
- FE Coding (HTML/CSS/JS)
- Token studio / Storybook
- Brand and styleguides
- 2D & 3D illustrations / Lotties creation

TOOLS

- Claude AI
- Vibe Design / Coding
- Hermes Agent
- Ollama
- MCPs integrations
- Figma
- Adobe suite
- 3D parametric tools
- Maze
- Darkly
- GA4
- Playwright
- Github
- VScode
- Xcode
- Linear
- Jira
- Notion
- Mira & Slack

I SPEAK

- Greek
- English (Fluent)

EXPERIENCE

instacar

Jun 2023 - Currently

Athens, Greece

Senior UX / Product Design Lifecycle

Key Responsibilities

- Drive the full product design lifecycle - **from discovery and research to prototyping, testing, UXUI and final QA delivery.**
- Conduct user interviews, usability tests, and customer journey mapping to uncover insights and define product direction.
- Translate findings into intuitive wireframes, user flows, and high-fidelity prototypes in Figma.
- **Design & testing** responsive, accessible interfaces that reflect instacar's evolving brand and product strategy.
- Prepare comprehensive **test plans** early in the DLC, proactively identifying logic gaps, UX debt, and edge cases before development begins.
- Executed **manual testing** for mobile apps & web clients **with a designer's eye**, ensuring end-to-end flows are not only functionally correct but also visually consistent and highly intuitive for the end-user.
- Applied deep knowledge of **iOS** (Human Interface Guidelines) and **Android** (Material Design) constraints to validate native behaviors, ensuring test coverage addresses platform-specific nuances and device variations.
- **Acted as the crucial link between QA, Mobile Developers, and Design teams**, effectively translating complex mobile integration flows into clear functional and integration test scenarios.
- Collaborate daily with product managers, developers, and stakeholders to iterate quickly and effectively.
- Contribute to **shaping our internal design & testing culture** and mentoring junior designers & manual QA engineers when needed.

Skills & Tools

- Expert in Figma, FigJam, and maintaining scalable design systems.
- Strong foundation in UX research and interaction design.
- Experienced in working with data tools like Hotjar, MS Clarity* and Google Analytics to guide design decisions.
- Streamlined the bug reporting process by **integrating AI tools for automatic ticket creation**, instantly translating crash logs, user feedback, and test failures into structured Linear tickets with auto-generated steps-to-reproduce.

WeatherXM

Aug 2021 - Sep 2023

Athens, Greece

UX / Product Designer

I specialise in crafting intuitive user experiences for our Web3-powered weather solutions. My role involves designing decentralised applications (dApps) that integrate blockchain technology, ensuring seamless usability for both crypto-savvy users and those new to Web3. I lead the end-to-end design process, including user research, wire-framing, prototyping, and testing, to create interfaces that bridge the gap between complex blockchain functionality and user-friendly design. Collaborating closely with the product team, I focus on delivering innovative solutions that drive user engagement and adoption in the Web3 space.

After Apr 2023, I lead the UXUI design effort alongside a team of 23 consisting blockchain engineers, researchers, managers and stakeholders to design test and ship the final product.

Ex Machina

Dec 2020 - May 2023

Athens, Greece

Industrial Design Engineer

I had hands-on industry experience with building, scaling and shipping real world hardware product and create custom UXUI flows for ESP32 micro-controller devices in a team of 6 along my BE at the University of Western Macedonia.

PERSONAL PROJECTS

Parkout - P2P Parking Application

Jan 2025 - Currently

Product Vision, UXUI Strategy & Design

Design & test a peer-to-peer parking platform that transformed Athens' chronic parking shortage into a cooperative swapping ecosystem, enabling real-time spot exchanges between urban drivers.

Bisector Computational Design & Digital Fabrication Studio

Apr 2020 - Currently

Owner

Expertise in developing cohesive brand identities, creating comprehensive style guides, and ensuring visual consistency across all platforms to effectively communicate brand values and enhance market presence.

Skilled in conceptualising, designing, and executing end-to-end packaging solutions, combining creative design, structural engineering, and sustainable material selection to deliver functional and visually impactful packaging that aligns with brand identity and market trends.

EDUCATION

BE, Product & Systems Design Engineering

2018 - 2022

University of Western Macedonia
